

WireIE Sponsors WAN Summit in New York

CTO George Kaichis addresses how Next Generation Technology supports Mission Critical Applications in Underserved Regions

Toronto, ON – April 15, 2015 — WireIE, a licensed wholesale carrier specialized in the development of Carrier Ethernet networks to underserved markets, announces its sponsorship of the WAN Summit in New York City. WireIE's CTO, George Kaichis, will be speaking in a panel discussion highlighting the challenges faced in extending WAN networks to underserved areas. The event takes place April 27th and 28th, 2015, at the Helen Mills Event Space and Theatre.

The WAN Summit brings together corporate WAN strategists and service providers to spark ideas, gain new perspectives, and initiate conversations with suppliers, customers, and peers.

“With the increasingly global nature of enterprise workforces, technology helps bridge the gap and brings workers together in underserved areas without compromising quality or performance”, says George Kaichis, Chief Technology Officer of WireIE. “By extending infrastructure to underserved locations, enterprises will benefit from improved access to technology and applications that contribute to an enhanced digital quality of life.”

WireIE uses a hybrid architecture based on fiber and digital radio, delivering metro-quality, high-availability networks to underserved markets. Availability in any location is especially important for enterprises that have offices in geographically dispersed areas that must currently contend with low bandwidth and unreliable connectivity.

“WireIE prides itself on being an industry leader and providing a unique business model to the marketplace,” says Rob Barlow, Chief Executive Officer of WireIE. “Our high-availability networks deliver the connectivity needed throughout all parts of the Americas, and our dedication to customer satisfaction and corporate social responsibility is unparalleled. Sponsoring this summit allows WireIE to facilitate the exchange of ideas that provide industry leaders with the proper insight to enhance the overall value of their organizations.”
